DETAILED ACTION

Election/Restrictions

Upon further review of claim 8, the following restriction was necessitated.

Newly amended claim 8 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Claim 8 drawn to the method of rigidly joining abutting ends of relatively soft plastic conduits using toggle clamps, and providing relatively smooth surfaces at the internal joint, preparatory to installation of cable in said conduits.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 8 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 9 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 9 recites, "two half shells joined by a plurality of hinges"; however, the specification of the instant application recites, "In this figure the half shell 12 and half

shell 14 are joined by hinge pin 16". Therefore, the specification does not enable the claimed subject matter.

Claim Rejections - 35 USC § 103

Page 3

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over US patent 3540758, Torres in view of US design patent D470282, Bjork.

In regards to claim 9, Torres discloses a coupling for joining abutting ends of relatively soft plastic conduit, comprising:

- a) a seal (71),
- b) two half shells (29, 31) joined by a plurality of hinges (39) with gripping means on a first end of the half shells, with gripping means on a second opposite end of the half shells, and a circumferential cavity between the first end and the second end to encompass and compress the seal.
- c) a first toggle clamp (43) integral with the half shells located substantially over the gripping means on the first end of the half shells, and
 - d) a second toggle clamp (43a),

whereby, actuation of the first and second toggle clamps causes the half shells to encompass, grip, and lock together the conduit ends and the seal prevents leakage in or out of the conduit ends. Torres does not disclose the second toggle clamp integral

Art Unit: 3679

with the half shells located substantially over the gripping means of the second opposite end of the half shells. In Figure 1, Bjork teaches second toggle clamp integral with the half shells located substantially over the gripping means of the second opposite end of the half shells. It would have been obvious to one having ordinary skill in the art at the time the invention was made to integrate second toggle clamp with the half shells located substantially over the gripping means of the second opposite end of the half shells, since the reversal of components in a prior art reference, where there is no disclosed significance to such reversal, is a design consideration within the skill of the art. In re Gazda, 219 F.2d 449, 104 USPQ 400 (CCPA 1955); In re Japikse, 181 F.2d 1019, 86 USPQ 70 (CCPA 1950).

Allowable Subject Matter

Claims 1 and 5-7 are allowed.

Response to Arguments

Applicant's arguments with respect to claims above have been considered but are most in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3679

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aaron M. Dunwoody whose telephone number is 571-272-7080. The examiner can normally be reached on 7:30 am - 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on 571-272-7087. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
